Summary

Experience

- 2 months of experience as a volunteer software engineer at Folk Computer, where I contributed to the development of PNG rendering code, error handling, an orbital mechanics simulator, and many guides and resources to a modern AR system.

Skills

- Experienced Full Stack Developer in Rust, C, Python, JavaScript, and many CSS frameworks.
- Other skills: Linux, public speaking, System Administration, German & French

Career highlights

- Successfully completed multiple research projects as part of the BridgeUP STEM program and received IRB certification.
- Led a hybrid workshop/talk on the solidity language for the Ethereum blockchain to over 400 people at Liquid Hacks.
- Awarded the NCWIT Georgia Honorable Mention for my work in computing
